

ANDREI KENNETH MORENO

kennonirom@gmail.com | github.com/andreikennethmoreno | linkedin.com/in/kennmoreno/ | Cavite, Philippines

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, C#, SQL, HTML/CSS, PHP

Frameworks/Libraries: React, Next.js 15, Flask, .NET, Tailwind CSS, ShadCN UI, Drizzle ORM, Prisma ORM

Technologies: Git, Docker, AWS (S3, EC2), Azure DevOps, PostgreSQL, Neon, Figma, Gemini API, Groq, RAG

EDUCATION

Bachelor of Science in Computer Science

June 2021 – Present

Cavite State University • Bacoor, Philippines

EXPERIENCE

Technical Content Creator

October 2023 – Present

Self-Employed / YouTube • Remote

- Produced and published in-depth technical tutorials on web development, growing the channel to 100,000+ total views and establishing a consistent audience of developers across skill levels.
- Collaborated with Neon to showcase and beta-test Neon Auth — an authentication solution enabling seamless user table syncing and third-party account linking — producing a dedicated feature video and providing structured product feedback to Neon's engineering team on usability, documentation, and developer experience.

Developer Intern

July 2024 – November 2024

IOT Technology, Inc. • Philippines

- Designed UI/UX mockups and interactive prototypes in Figma for client-facing web applications, translating stakeholder requirements into production-ready designs.
- Built a booking management system MVP using React, delivering a fully functional prototype under accelerated timelines for client review.
- Upgraded a full-stack e-commerce platform with Next.js 15, PayPal payment integration, ShadCN UI, and Neon PostgreSQL, improving checkout reliability and product management workflows.

Software Development Mentee

April 2024 – June 2024

Independent Mentorship • Philippines

- Contributed backend development for an enterprise-grade ship management system for marine crewing operations, building RESTful APIs and data models using .NET and SQL Server.
- Developed frontend in Next.js for crew management dashboards, handling scheduling and operational data workflows.
- Utilized Azure DevOps for CI/CD pipeline management and version control, gaining hands-on exposure to enterprise DevOps practices in a real project environment.

PROJECTS

NextGen LMS – AI-Powered Learning Management System — *Next.js 15 · Flask · AWS · Docker · Gemini · Groq · Drizzle ORM · Neon*

- Architected and deployed a full-stack LMS adopted across 3 academic institutions — CVSU Bacoor, Perpetual Help College Bacoor, and San Nicolas High School Bacoor — reaching 1,000 + students as a thesis capstone project.
- Built a dual-engine AI course generation system using Google Gemini and Groq, supporting both open-ended prompt-based generation and RAG-grounded generation from curated documentation sources to reduce hallucinations.
- Developed a career roadmap generator that scrapes live job listings from JobStreet, LinkedIn, and Indeed, cleans and processes data through a Gemini-powered AI pipeline, and generates role-specific learning paths for Entry, Mid, and Senior levels.
- Deployed a polyglot programming sandbox supporting 12+ languages (JavaScript, Python, Java, Go, Rust, etc.) on AWS EC2 with Monaco Editor integration for real-time in-browser code execution during lessons.
- Containerized the job scraper and documentation scraper services using Docker and deployed independently on AWS, each backed by Flask APIs with Gemini-powered content cleaning pipelines.
- Implemented role-based access control (Student, Teacher, Admin), automated PDF certificate generation with unique verification IDs, AI-driven quiz generation, and knowledge gap tracking with personalized strength/weakness reports.

CERTIFICATES

CS50x: Introduction to Computer Science (2023) *Harvard University via edX*

CS50w: Web Programming with Python and JavaScript (2024) *Harvard University via edX*
